ABOUT ME

Keeping up with the latest trends of technology is a passion of mine. My passion for technology has grown even more with my career change into software development. Previously most of my jobs were doing something regarding maintenance. Trying to understand, build, and repair things. Being faced with a new problem and trying to learn how to tackle it is something that I love about software development. I am looking forward to seeing where I will go in the field of software development!

EDUCATION

NASHVILLE SOFTWARE SCHOOL
APR 2020 - SEP 2020

PROJECTS

2CENTS
Front-End Capstone

2cents is an expense tracker that will keep track of expenses by month and year. A user can create projects where they can track their contributions towards paying a debt off or saving up for something. A user can also search for specific stocks or cryptos and save it to the homepage so they can get a quick view of how their favorite stocks or cryptos are doing. This app was built using React and used React Bootstrap for modals and forms. This app also used chart.js to display any charts and moment.js to format dates.

NOTES

EXPERIENCE

NSS - FULL STACK WEB DEVELOPER
APR 2020 - SEP 2020

A very hands on 6 month software development program that revolves around working in groups on developing web applications as well as learning to think more like a software developer. Full-stack technologies were used heavily to finish the web applications.

- VScode for the ide environment.
- Tech stacks JavaScript, React.js, React Bootstrap, HTML5, CSS3 were used to make dynamic applications
- Git and Github was used for version control and keeping the group on the right track
- Zoom was also used for group interaction and and creating an enviornment that closely resembles in person.

Securitas - Security Officer
DEC 2017 - MAY 2020

- Contacting, responding to and interfacing with fire, police, and emergency personnel for emergencies.
- Detecting and reporting public and private safety hazards at the assigned client location.
- Deterring intruders and preventing criminal activity.
- Reporting daily activity and patrolling the assigned client location when needed.

Morris Estates - Maintenance Technician
JAN 2016 - NOV 2016

- Responding to emergency maintenance calls for anything the tenants needed 24/7.
- Interacting with tenants and providing excellent customer service.
- Contacting and interacting with police and fire personnel for emergency events such as fires and law enforcement activities.
- Reporting to supervisor and completing repair list for the day.
